### Description

FR-S1118GS-240P2 16 port 10/100/1000Mbps + 2 port 1000Mbps SFP Slots Multi-Mode PoE Ethernet Switch provides the seamless network connection. This device integrates 1000Mbps Gigabit Ethernet, 100Mbps Fast Ethernet and 10Mbps Ethernet network capabilities. And also can be manually switched to a Normal mode, or LAN mode, or Extend mode to suitable for various occasions flexibly. Based on Gigabit Ethernet Technology, it is essential to helping solve network bottlenecks that frequently develop as more advanced computer users and newer applications continue to demand greater network resources.

These POE ports can automatically detect and supply power with those IEEE 802.3at compliant Powered Devices (PD). In this situation, the electrical power is transmitted along with data in one single cable allowing you to expand your network where there are no power lines or outlets, where you wish to fix devices such as AP, IP Cameras or IP Phones, etc.

The product is highly integrated design, simple operation, a variety of models optional, suitable for a variety of applications, especially for security monitoring occasions.
